

Vetle Larsen Gundersen

📍 Oslo ✉ vetlelg@hotmail.com 📞 91391513 🌐 in/vetlelg ☁ vetlelg.com

KEY QUALIFICATIONS

- **Software Engineering:** Computer Science student specializing in Software Engineering. Has experience with Kotlin/Java/Spring Boot, C#/.NET, JavaScript/React, CSS/HTML, Bootstrap, SQL, Docker, Azure and other relevant technologies through studies and practical projects
- **IT Operations and Infrastructure:** Several years of experience in IT support, operations, and monitoring of networks and infrastructure at Intility.
- **Problem-Solving:** Strong problem solving abilities and extensive experience in troubleshooting IT systems.
- **Communication:** Experience with effective communication during stressful and business-critical incidents.

EDUCATION

Bachelor's Degree, Software Engineering | Oslo Metropolitan University | GPA: 4.64/5.00

Oslo | August 2022 - Present

- The program covers a wide range of subjects within Computer Science and Mathematics, but my primary focus has been within Software Engineering
- Student representative for the course ITPE3100 (Cyber Security): Presented issues and feedback from students to the course instructor and faculty.
- I'm doing an extra course this spring: Software Testing (10 credits), Resource-Efficient Programs (10 credits), and Bachelor's Thesis (20 credits).

Pre-Engineering Course | Oslo Metropolitan University

Oslo | August 2019 - June 2020

- Required to apply for Engineering. Subjects: Mathematics (R1/R2), Physics (FY1), Technology and Society, Communication and Norwegian for Engineers.

Trade Certificate, Computer Electronics | Elvebakken vgs., Sogn vgs. and Intility

Oslo | August 2009 - January 2014

- The first three years included a wide range of subject within IT and electronics. The last 18 months were an apprenticeship at Intility.
- Apprenticeship at Intility: IT support and operations. Exam: Set up Windows Server, Active Directory, file server, network, backup and similar tasks.
- I had some practical internships where I worked on tasks such as assembling, installing, and repairing PCs, fiber cabling, and installing projectors.

EXPERIENCE

Incident Responder | Intility | Oslo | November 2017 - July 2022

- Operations, monitoring and incident management of network and server infrastructure, as well as a wide range of business applications and services
- Handle incidents and alerts from our monitoring system, troubleshooting and resolving incidents, or escalating complex or critical incidents. Common incidents included network outages, comline issues, server outages, resource usage on servers (CPU, memory, disk) and networks, issues with applications or services on servers, etc. Other operational tasks included deleting servers, adjusting server resource usage (CPU, memory, disk), server backups, database backups, restoring servers and files from backups, and similar tasks.
- I worked with technologies such as Windows Server, Linux, Cisco, VMWare, Azure, Splunk, as well as Intility's monitoring systems.
- Training of support technicians in monitoring and incident management.
- Worked part-time from August 2019 to December 2020 while studying.

Senior Technician | Intility | Oslo, Singapore, Auckland | October 2015 - October 2017

- Distribute tickets, help other support technicians and handle more complex tickets.
- Training of apprentices and new employees.
- 3 months in Auckland, New Zealand, where I would handle business-critical incidents happening outside normal working hours
- 12 months at Intility's office in Singapore, where I contributed with the establishment of 24/7 support, monitoring and incident management from Singapore. I also provided on-site support for a customer in Singapore and assisted on-site during the onboarding of a new customer in Hong Kong.

Technician | Intility | Oslo | February 2014 - September 2015

- Technical support with specialization in the business applications of Intility's customers.
- Training of apprentices and new employees.

Technical Apprentice | Intility | Oslo | July 2012 - January 2014

- Apprenticeship. Technical support via phone, e-mail and chat.

PROJECTS

Bachelor's Thesis | Decisive AS | Spring 2025

- This semester we are working on our bachelor's project with Decisive AS. One of their clients uses an HTTP-based solution for message distribution between applications in an event-driven architecture. The current solution is pull-based, and our task is to improve performance by creating two new push-based solutions. One will test the use of Long Polling, and the other will test the use of Server-Sent Events. We will then determine which solution is most suitable. The solutions will be built on Spring Boot with Kotlin. We will use a PostgreSQL-database which will run in a Docker image. R2DBC will be used for push-based, asynchronous, and reactive communication with the database.

ITPE3200 - Web Applications | Oslo Metropolitan University | github.com/vetlelg/ITPE3200-Web-Applications | Fall 2024

- School project where we developed a map application for registering and storing markers on a map, including information about the location, images, and comments. We initially used ASP.NET MVC, followed by creating a similar project with React and ASP.NET Web API. Google Maps JavaScript API was used for the map. EF Core and SQLite were utilized as database technology. The design was created using Bootstrap and CSS. This is a full-stack web application that includes both server-side and client-side input validation, error handling, logging, and unit testing, as well as user registration, cookie authentication, and authorization with ASP.NET Identity.

DAVE3600 - App Development | Oslo Metropolitan University | github.com/vetlelg/DAVE3600-App-Development | Fall 2024

- App development school projects for Android using Java. Created an app for simple math exercises, an app for storing phone numbers and automatic sending of birthday-SMS to friends, and an app for storing markers on a map in an SQL database using Google Maps Android SDK.

vetlelg.com | Personal Project | github.com/vetlelg/vetlelg-frontend | Fall 2024

- Portfolio website for showcasing my projects and resume. Hosted in Azure using Azure Static Web Apps with automatic deployment from GitHub.

DATA2410 - Networking and Cloud Computing | Oslo Metropolitan University | github.com/vetlelg/DATA2410-DRTP | Spring 2024

- School project in socket programming with Python. A file transfer application for sending files over a network between a client and a server. The application uses UDP and implements TCP-like functionality with Python at the application layer on top of UDP. This includes a three-way handshake to connect the client to the server, a Go-Back-N sliding window protocol for data transfer, and a two-way handshake for connection teardown.

DATA1700 - Web Programming | Oslo Metropolitan University | github.com/vetlelg/DATA1700-Webprogramming | Spring 2023

- School projects in full-stack web programming using Java Spring Boot, JavaScript, Bootstrap, and SQL. This course also covers topics such as client-side and server-side input validation, error handling and logging, cookie authentication, sessions, and hashing and salting of passwords. In the first part of the course, we used manual SQL queries, and later transitioned to using ORM (JPA).

DATA1200 - Inclusive Web Design | Oslo Metropolitan University | github.com/vetlelg/final-assignment | Fall 2022

- School project in inclusive and responsive web design using only HTML and CSS. The course covers topics such as semantic HTML, CSS Box Model, Flexbox, Grid, inclusive web design, WCAG and more.

COURSES AND CERTIFICATIONS

CS50: Introduction to Cybersecurity | Harvard Online | 2024

- Basic concepts in Cybersecurity: Symmetric/asymmetric encryption, hashing algorithms, network security, and software security.

JavaScript Algorithms and Datastructures | freeCodecamp | 2023

Azure Fundamentals | Microsoft | 2021

- Basic theory and practical use of Azure

CS50: Introduction to Computer Science | Harvard Online | 2020-2024

- Basic programming in C, algorithms and data structures in C, and memory management in C.
- Basic web development in CSS, HTML, JavaScript, Python, and Flask.
- Databases and SQL
- Short introduction to AI and Cybersecurity

Learn C#, Learn Java, Learn HTML, CSS, Learn JavaScript, Learn Bootstrap, Learn React, Learn Kotlin | Codecademy | 2020-2024

- I use Codecademy to quickly learn basic syntax and to get started with a new language or framework

LANGUAGE

Norwegian: Native speaker

English: Fluent
